

## REGIONAL AEROMAG SURVEY COMPLETED AT ELIZABETH PROJECT

Tempus Resources Ltd (“**Tempus**” or “the **Company**”) (ASX: TMR, TSX.V: TMRR) is pleased to announce that a regional airborne magnetic survey has been completed over the entire Elizabeth Gold Project area in Southern BC, Canada.

Tempus President & CEO, Jason Bahnsen, commented ***“We anticipate that the magnetic survey will generate additional targets over the 115 square kilometre project area as part of our regional exploration programme. In addition, drilling is about to commence on the South West vein with teams and equipment being mobilised to Elizabeth site this week.”***

Tempus has completed a high-resolution aeromagnetic and radiometric survey over the entire 115 square km Elizabeth claim area as was previously discussed in an announcement dated April 12, 2021 (Blackdome-Elizabeth Project Update and Exploration Plan 2021).

Precision Geophysics was contracted and completed 97 lines for a total of 735 line-kilometres. Flight lines are oriented east-west with north-south tie lines and spaced 200 metres across the entire Elizabeth property (Figure 2). 100 metre line-spacing was flown over the known Elizabeth zone and eastern extension where the 2019 soils survey returned very encouraging anomalies in gold, and associated epithermal style elements (Silver, Arsenic, Antimony, Bismuth, and Mercury) (Announcement released January 8<sup>th</sup>, 2020).

The aeromagnetic survey will help in defining the granite type intrusion which is host to the high-grade quartz-gold epithermal veins. 2020 diamond drill in to the SW Vein at Elizabeth returned;

- EZ-20-06: 5.0m at 61.3g/t gold from 116.5m, including 1.5m at 186.0g/t gold from 118.0m
- and
- EZ-20-10: 3.2m at 28.1g/t gold from 184.0m, including 0.5m at 178.0g/t gold from 184.5m

The aeromagnetic survey will also assist in identifying additional granitic intrusions, within the ultramafic country rocks of the Shulaps Mountain Range. The magnetic contrast between these two rock types is expected to provide additional exploration targets in the larger 115km<sup>2</sup> Elizabeth Property.

Tempus technical staff will review data from the survey when it has been finalised by Precision Geophysics and assess regional exploration targets at that time.

This announcement has been authorised by the Board of Directors of Tempus Resources Limited.

### Competent Persons Statement

Information in this report relating to Exploration Results is based on information reviewed by Mr. Kevin Piepgrass, who is a Member of the Association of Professional Engineers and Geoscientists of the province of BC (APEGBC), which is a recognised Professional Organisation (RPO), and an employee of Tempus Resources. Mr. Piepgrass has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined by the 2012 Edition of the Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves, and as a Qualified Person for the purposes of NI43-101. Mr. Piepgrass consents to the inclusion of the data in the form and context in which it appears.

### ***About Tempus Resources Ltd***

Tempus Resources Ltd (“Tempus”) is a growth orientated gold exploration company listed on ASX (“TMR”) and TSX.V (“TMRR”) and OTCQB (“TMRFF”) stock exchanges. Tempus is actively exploring projects located in Canada and Ecuador. The flagship project for Tempus is the Blackdome-Elizabeth Project, a high grade gold past producing project located in Southern British Columbia. Tempus is currently midway through a drill program at Blackdome-Elizabeth that will form the basis of an updated NI43-101/JORC resource estimate. The second key group of projects for Tempus are the Rio Zarza and Valle del Tigre projects located in south east Ecuador. The Rio Zarza project is located adjacent to Lundin Gold’s Fruta del Norte project. The Valle del Tigre project is currently subject to a sampling program to develop anomalies identified through geophysical work.

### ***Forward-Looking Information and Statements***

This press release contains certain “forward-looking information” within the meaning of applicable Canadian securities legislation. Such forward-looking information and forward-looking statements are not representative of historical facts or information or current condition, but instead represent only the Company’s beliefs regarding future events, plans or objectives, many of which, by their nature, are inherently uncertain and outside of Tempus’s control. Generally, such forward-looking information or forward-looking statements can be identified by the use of forward-looking terminology such as “plans”, “expects” or “does not expect”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates” or “does not anticipate”, or “believes”, or variations of such words and phrases or may contain statements that certain actions, events or results “may”, “could”, “would”, “might” or “will be taken”, “will continue”, “will occur” or “will be achieved”. The forward-looking information and forward-looking statements contained herein may include, but are not limited to, the ability of Tempus to successfully achieve business objectives, and expectations for other economic, business, and/or competitive factors. Forward-looking statements and information are subject to various known and unknown risks and uncertainties, many of which are beyond the ability of Tempus to control or predict, that may cause Tempus’ actual results, performance or achievements to be materially different from those expressed or implied thereby, and are developed based on assumptions about such
