

CLAYPAN DAM PROJECT UPDATE

- Application for a Resource Exploration Access Permit submitted to the Department of Defence.
- Project located in the renowned Gawler Craton of South Australia.
- Field work to commence upon permit grant, to initially include a ground gravity survey and geochemical sampling program.

Tempus Resources Ltd (“**Tempus**” or “the **Company**”) is pleased to advise that an application for a Resource Exploration Access Permit has been submitted to the Department of Defence, for the Claypan Dam Project (Figure 1). This application is required to allow on-ground exploration to proceed, as the Project is located within the Woomera Prohibited Area.

The Claypan Dam Project targets a geological setting analogous to that which hosts iron oxide copper gold (IOCG) style mineralisation found elsewhere in the Gawler Craton. The tenement area includes an intrusion interpreted to be a granite of the Gawler Range Volcanic/Hiltaba Suite age with an obvious contact aureole (Figure 1).

Upon receipt of the required permit, the Company intends to undertake Phase 1 of the proposed exploration program, which will include a ground gravity survey and geochemical sampling program, with the aim of further defining targets ahead of drill testing.

Competent Persons Statement

Information in this report relating to Exploration Results is based on information reviewed by Mr. Brendan Borg, who is a Member of the Australasian Institute of Mining and Metallurgy and a Director of Tempus Resources. Mr. Borg has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined by the 2012 Edition of the Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Borg consents to the inclusion of the data in the form and context in which it appears.
