

## **BLACKDOME-ELIZABETH GOLD PROJECT UPDATE**

- **Notice of Work approved for Blackdome drilling to commence**
- **Drilling equipment mobilising to Blackdome next week, with drilling to commence shortly thereafter**
- **Initial application completed for proposed listing on the TSX Venture Exchange**

Tempus Resources Ltd (“**Tempus**” or “the **Company**”) is pleased to provide an update on field activities at the Blackdome-Elizabeth Gold Project, located in British Columbia, Canada.

As foreshadowed in the announcement of 29 June, 2020, approval of the Company’s Notice of Work has now been received from the British Columbia Ministry of Energy, Mines and Petroleum Resources (EMPR), paving the way for the Company’s much anticipated maiden drilling program at Blackdome-Elizabeth to commence.

The program of approximately 8,500 metres of diamond drilling is aimed at verifying and expanding upon the historic high grade NI43-101 Mineral Resources at the Blackdome and Elizabeth sectors of the Project.

The Company’s drilling contractor has advised they expect to begin mobilising equipment to Blackdome next week, with the drilling and trenching programs expected to run until at least October.

Given the Company’s focus on projects in Canada and Ecuador, the planned listing on the TSX Venture Exchange (TSX-V) in Canada is being rapidly progressed. The required initial application has been submitted, and Tempus is targeting listing in Q4, 2020.

### ***About the Blackdome-Elizabeth Gold Project***

Tempus is focussed on rapidly verifying and expanding the historical high grade Mineral Resource at the Blackdome-Elizabeth Project in British Columbia by drilling extensions to existing mineralisation and other high priority targets within the 350 km<sup>2</sup> licence area, which remains relatively unexplored. Tempus also intends to leverage the existing permitted mill, tailings dam and other infrastructure at Blackdome with the aim of re-commencing production as the Project proceeds.

This announcement has been authorised by the Board of Directors of Tempus Resources Limited.
